

Claims

[c1] As the plant grows it will put roots down into the reservoir and grow into the wick. This allows the plant to have plenty of water. Plants will self regulate their water intake naturally in this environment. Components including the wick will vary in diameter, length, and thickness depending on the size of container. The drawing shows the preferred embodiment of the invention. Although the invention has been described in detail with particular reference to these preferred embodiments, other embodiments can achieve the same results. Variations and modifications of the present invention will be obvious to those skilled in the art and it is intended to cover all such modifications and equivalents.

[c2]
